Overview

Cochin International Airport, owned and operated by Cochin International Airport Limited (CIAL), is the first airport in India built under Public Private Partnership (PPP). Remarkably, it is the world's first fully solar-powered airport. Located 28 km northeast of downtown Kochi, it ranks as the third busiest for international passengers and seventh largest overall in India.

CIAL is a winner of the prestigious ' Champions of the Earth ' award instituted by United Nations for its pioneering effort which showed the world that it is possible for large power consumers like an airport to switch over to sustainable utility model for its energy needs.

At present the total installed capacity of CIAL's green energy initiatives is 50 MWp producing 200,000 units of power daily. The airport features three terminals, including India's first charter gateway— an exclusive Business Jet Terminal. For over 25 years of dedicated service, Cochin International Airport has seamlessly connected 31 countries, collaborating with 26 airlines and is welcoming more than 10 million passengers annually to its world-class facilities. Despite not being publicly listed, the company has a robust foundation with 19,000 investors hailing from 28 countries, primarily expatriate Keralites. This diverse investor base has played a crucial role in nurturing the airport.

The airport was inaugurated on 25th May 1999. Since then the traffic and revenue parameters have registered a steady growth. Owing to the financial restructuring and aggressive marketing implemented by the Board of Directors, the Company has witnessed growth in both revenue and traffic. CIAL became the sole airport in the country during the post pandemic year to register a profit. In 2023-24, the company logged a profit of Rs.412.57 crore and in 2024-25 the profit increased to Rs.489.84 crores. In its 25 years of operational history, it handled over 10 million passengers in a calendar year in 2025.
